Weather Key Points

Regional Operations Center

Western Region

Wednesday, November 9

- Precipitation across the state will diminish through the day today
 - Some localized impacts to travel are possible over the Sierra through midday due to lingering snowfall, but no widespread impacts are expected
- Much colder temperatures will be noted over much of the state through the weekend, with overnight low temperatures dipping well into the 30s over the Central Valley, and into the single digits and teens across the higher elevations
- Some mainly light precipitation could return to northern and central California this weekend and early next week, though no significant impacts are expected

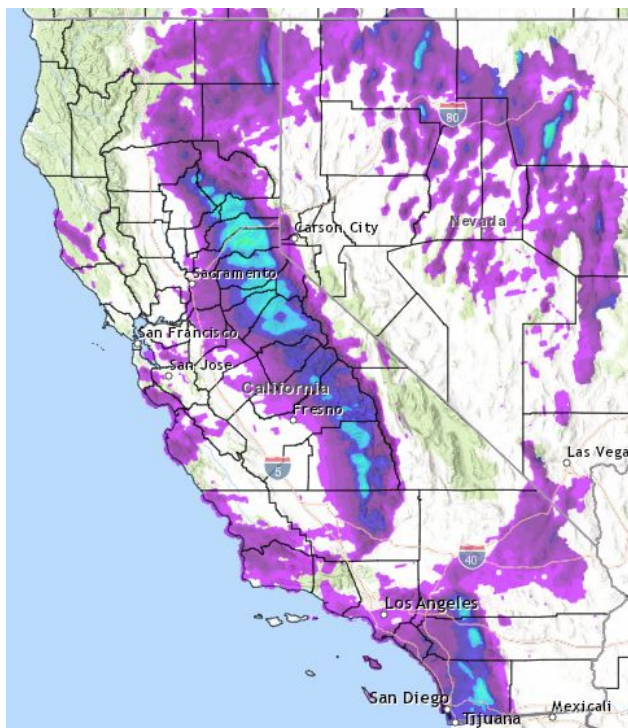

Daily Precipitation Forecast

Regional Operations Center

Western Region

Wednesday, November 9

Wednesday

Thursday

Friday

Important Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms will produce locally much higher rainfall amounts.

Precipitation (inches)

Weather Outlook (6-14 Days)

Regional Operations Center

Western Region

Wednesday, November 9

6-10 Day Outlook (November 14 - 18)
